# TOSHIT KUMAR CHAUHAN

ICT Trainer • Web Developer • Game Developer • Content & AI Specialist

Kumartoshit82@outlook.com +91 80777 18423 Noida, Uttar Pradesh

## PROFESSIONAL SUMMARY

Multi-skilled technology professional with 3+ years of experience spanning ICT training, web and software development, game development, video production, AI, and cybersecurity. Currently working as Process Trainer – ICT at ICT360 (ARK Tech Innovation Pvt. Ltd), delivering impactful training to 50+ schools. Combines hands-on technical range — from Arduino-based robotics and full-stack scripting to AI prompt engineering, AI-assisted filmmaking, and ethical hacking — with a strong content production and design skill set across video, graphics, and UI/UX. Known for bridging education, engineering, and creative production to build engaging, technology-driven learning experiences, with the adaptability to move fluidly between training, building, and producing.

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, HTML5, CSS3, C, C++, C#, Arduino IDE (C/C++)

**AI & Machine Learning:** Generative AI, AI Prompt Engineering, AI Agent Design, AI Filmmaking, Machine Learning & Deep Learning (Robotics), AI-assisted Automation with Python

**Backend & Databases:** SQL, Python, JavaScript (server-side logic)

**Game Development:** Unity, GDevelop, Unreal Engine, Wick Editor, Stop Motion Animation

**Video Editing & VFX:** Adobe Premiere Pro, Adobe After Effects, DaVinci Resolve, Filmora, OBS Studio, Content Design (Scripting & Editing)

**Graphic Design & UI/UX:** Adobe Photoshop, Adobe Illustrator, CorelDRAW, Adobe InDesign, Adobe XD, Figma, Adobe Dimension, Adobe Substance, Krita

**Electronics & Robotics:** Arduino Uno & Custom Boards, Tinkercad (Circuit & 3D Design), Microcontrollers, Flight Controllers, Micro:bit, Blender, iClone

**Cybersecurity & Systems:** Linux (Kali Linux, RedHat, Parrot OS), Ethical Hacking, Windows PowerShell, Android App Development

**Data & Analytics:** Power BI, Data Visualization, MS Office, Google Workspace, LibreOffice

**Dev Tools & Platforms:** GitHub, Visual Studio, VS Code, PyCharm, Arduino IDE, Unity Editor

**ICT Training & Education:** Process Training, Online Training, Hardware Training, School Coordination, Curriculum & Instructional Design

**STEAM & Educational Tools:** Krita, MakeCode, Arduino IDE, PyCharm, VS Code, Visual Studio, GDevelop, Unity, Adobe Dimension, Blender, PictoBlox, OpenCode (Offline AI), Wick Editor

**Core Competencies:** Content Design & Scripting • AI Filmmaking • Cross-Domain Problem Solving • Full-Cycle Production • Team Coordination • Communication • Adaptability • Multi-tasking • Woodworking

## WORK EXPERIENCE

### Process Trainer – ICT & Content Designer (Hardware & Software Tools)

*2021 — Present • 3+ Years*

*ICT360 · ARK Tech Innovation Pvt. Ltd · Noida, UP*

- Works as Process Trainer and Content Designer for hardware and software training tools across the ICT and STEAM curriculum.
- Delivered ICT process training and online sessions to students and teachers across 50+ schools in the Noida region.
- Conducted hardware training including lab setup, maintenance, and troubleshooting for school computer labs.

- Developed the EduNexa Smart Portal — a multi-page interactive education platform with 147+ organized HTML pages and sidebar navigation.
- Designed and delivered Computational Thinking (CT) teacher training workshops in Hindi and English formats.
- Produced and edited educational training videos, handling end-to-end production from scripting to final delivery.
- Built interactive HTML-based educational content pages for school students, including CT modules in Hindi.
- Handled on-ground school coordination: scheduling, monitoring, program execution, and stakeholder communication.
- Managed multi-role responsibilities combining ICT training, web development, video production, and content creation.

### Medical Executive
*2024 • US Shift*

*Inficare*

- Worked as a Medical Executive supporting US-shift operations.

### AI Trainer
*2021 — 2023*

*Kanha Makhan Public School*

- Worked as an AI Trainer, teaching AI concepts and applications to students.
- Concurrently handled freelance web development work alongside this teaching role.

### Freelancer — Software, Graphics & Web Development
*2020*

*International Clients*

- Worked as a freelancer with international clients on software development, graphic design, and web application projects.

## KEY PROJECTS

**EduNexa Smart Portal (Aether Academy)** *[HTML5, CSS3, JavaScript]*
Large-scale multi-page education platform with 147+ organized HTML pages, injected sidebar navigation system, and interactive learning modules designed for school students.

**CT Workshop – Think Like a Pro** *[HTML5, CSS3, Instructional Design]*
Complete Computational Thinking teacher training workshop as a feature-rich single HTML file with Hindi and English versions, interactive exercises, and professional slide design.

**Unity & GDevelop Game Projects** *[Unity, C#, GDevelop]*
Developed interactive game projects using Unity (C#) and GDevelop, covering game mechanics, level design, and interactive storytelling for educational and entertainment use.

**Hindi ICT Interactive Content** *[HTML5, CSS3]*
Hindi-language interactive HTML pages for school students covering ICT and Computational Thinking — making digital education accessible and engaging for regional learners.

**Python Automation Scripts** *[Python]*
Utility scripts and automation tools for educational content management, data processing, and workflow efficiency.

**Army Radar — Through-Wall Object Detection** *[Arduino Uno, Ultrasonic Sensor, Wi-Fi Module]*
Built an Arduino Uno-based radar system using an ultrasonic sensor for object detection; extended it with a Wi-Fi module to enable through-wall detection of objects. Developed at Sanskriti University, 2019.

**Auto-Tracking Solar Panel** *[Arduino, Sensors, Servo Mechanism]*
Designed a self-adjusting solar panel system that automatically tracks and rotates toward the sun throughout the day, mimicking sunflower movement to maximize energy capture.

**Cybersecurity Awareness — PPTs & Live Demos** *[Cybersecurity, Ethical Hacking]*
Created and delivered cybersecurity presentations and live demonstrations covering ethical hacking concepts and security awareness at Sanskriti University.

**University Web Systems (4 Websites)** *[HTML5, CSS3, JavaScript, Backend Scripting]*
Designed and developed four websites for Sanskriti University, including a Canteen Management System that was actively used by the university from 2019 to 2020.

**Free Computer Science Education Platform** *[HTML5, CSS3, JavaScript — In Progress]*
Currently building a personal website project aimed at delivering free, accessible Computer Science education to learners everywhere.

## RESEARCH INTERESTS

- AI Token Bypass — researching methods by which AI systems' token/context limitations can be circumvented, for security and robustness evaluation.
- AI Sandbox Security — researching security considerations and safeguards for sandboxed AI execution environments.

## EDUCATION

**Bachelor of Computer Applications (BCA)**
*Graduated 2019 • Core subjects: C Programming, C#, Web Technologies, DBMS, Software Development*

## ADDITIONAL INFORMATION

- Languages: Hindi (Native), English (Professional)
- Open to opportunities in ICT Training, Ed-Tech, Web & Software Development, Game Development, Video Production, AI/Prompt Engineering, and Cybersecurity.
- Experience working with school management systems, LMS platforms, and digital education tools.
- Ability to manage multiple project types simultaneously across technical and creative domains.
